

# **GUIDELINES FOR USE OF SPRAY NINE Heavy Duty Cleaner**

## **Use:**

Spray Nine cuts through stubborn grease, grime and hard-to-remove soils. Spray Nine kills germs and disinfects. Used regularly, Spray Nine reduces the risk of cross-infection. Spray Nine cleans and disinfects hard non-porous surfaces.

## **Dilution & Mixing:**

This is a ready to-use-product. No mixing required.

## **Safety Data Sheet:**

Although this product is not a WHMIS controlled substance, a Safety Data Sheet is provided for additional information.

## **Application:**

Soiled or dirty surfaces must be cleaned prior to disinfection – C (cleaning) comes before D (disinfection). 1. Spray on a solid surface 2. wipe clean with a damp cloth 3. Re-spray until thoroughly wet; let stand for 45 seconds minimum (do not allow to dry on surface) 3. Wipe clean with a cloth. Food contact surfaces must be thoroughly rinsed with clean water.

## **Frequency of Use:**

Apply twice a day, generally once per shift. Frequency may be increased due to staff or client illness or during pandemic/epidemic situations.

## **Precautions:**

Avoid contact with eyes and skin. Wear gloves when using product. Do not spray onto electrical cords. Unplug small appliances before disinfecting surfaces. Do not spray directly onto phones, televisions or small appliances. Some high-touch electronics such as mobile devices, phones, computers and remote controls may require disinfection with rubbing alcohol or alcohol wipes.
